Savitha Gollamudi

Lead Full Stack Engineer

savitha@example.com Hyderabad, India linkedin.com/in/example github.com/example

Summary

Full stack engineer who ships product end to end: **React and TypeScript** front ends, Node.js and Python services, and the data layers underneath. Leads small teams and turns ambiguous requirements into predictable releases.

Experience

Lead Full Stack Engineer

Example Company A · Hyderabad, India

Dec 2023 – Present

- Example: leads a squad of engineers building customer-facing React/TypeScript dashboards on Node.js services.
- Example: defined API contracts and review standards; introduced typed end-to-end services.
- Example: set up performance budgets and caching for the slowest read paths.

React · TypeScript · Node.js

Senior Software Engineer

Example Company B · Hyderabad, India

2021 – 2023

- Placeholder: owned the web client of a B2B SaaS product (React, Redux Toolkit, TypeScript).
- Placeholder: introduced Storybook and visual regression tests for the shared component library.

Redux · PostgreSQL

Software Engineer

Example Company C · Bengaluru, India

2017 – 2021

- Placeholder: built Python and Node.js services backed by MongoDB for an internal platform.

Added role 1

Example Company

- Bullet 1: shipped a measurable improvement to a customer-facing React and TypeScript surface, with tests and docs.
- Bullet 2: shipped a measurable improvement to a customer-facing React and TypeScript surface, with tests and docs.
- Bullet 3: shipped a measurable improvement to a customer-facing React and TypeScript surface, with tests and docs.
- Bullet 4: shipped a measurable improvement to a customer-facing React and TypeScript surface, with tests and docs.
- Bullet 5: shipped a measurable improvement to a customer-facing React and TypeScript surface, with tests and docs.

Added role 2

Example Company

- Bullet 1: shipped a measurable improvement to a customer-facing React and TypeScript surface, with tests and docs.
- Bullet 2: shipped a measurable improvement to a customer-facing React and TypeScript surface, with tests and docs.

Experience (continued)

- Bullet 3: shipped a measurable improvement to a customer-facing React and TypeScript surface, with tests and docs.
- Bullet 4: shipped a measurable improvement to a customer-facing React and TypeScript surface, with tests and docs.
- Bullet 5: shipped a measurable improvement to a customer-facing React and TypeScript surface, with tests and docs.

Added role 3

Example Company

- Bullet 1: shipped a measurable improvement to a customer-facing React and TypeScript surface, with tests and docs.
- Bullet 2: shipped a measurable improvement to a customer-facing React and TypeScript surface, with tests and docs.
- Bullet 3: shipped a measurable improvement to a customer-facing React and TypeScript surface, with tests and docs.
- Bullet 4: shipped a measurable improvement to a customer-facing React and TypeScript surface, with tests and docs.
- Bullet 5: shipped a measurable improvement to a customer-facing React and TypeScript surface, with tests and docs.

Added role 4

Example Company

- Bullet 1: shipped a measurable improvement to a customer-facing React and TypeScript surface, with tests and docs.
- Bullet 2: shipped a measurable improvement to a customer-facing React and TypeScript surface, with tests and docs.
- Bullet 3: shipped a measurable improvement to a customer-facing React and TypeScript surface, with tests and docs.
- Bullet 4: shipped a measurable improvement to a customer-facing React and TypeScript surface, with tests and docs.
- Bullet 5: shipped a measurable improvement to a customer-facing React and TypeScript surface, with tests and docs.

Added role 5

Example Company

- Bullet 1: shipped a measurable improvement to a customer-facing React and TypeScript surface, with tests and docs.
- Bullet 2: shipped a measurable improvement to a customer-facing React and TypeScript surface, with tests and docs.
- Bullet 3: shipped a measurable improvement to a customer-facing React and TypeScript surface, with tests and docs.
- Bullet 4: shipped a measurable improvement to a customer-facing React and TypeScript surface, with tests and docs.
- Bullet 5: shipped a measurable improvement to a customer-facing React and TypeScript surface, with tests and docs.

Projects

Resume builder

One resume, themed per company with contrast-checked palettes.

React · Zustand

Skills

Frontend: React, Redux, TypeScript

Backend: Node.js, Python / FastAPI

Data: PostgreSQL, MongoDB, Redis

Certifications

Example cloud developer certification

Placeholder issuer

2024

Education

B.Tech, Computer Science

Example university

2013 – 2017
